Opening Hours

Full Service:

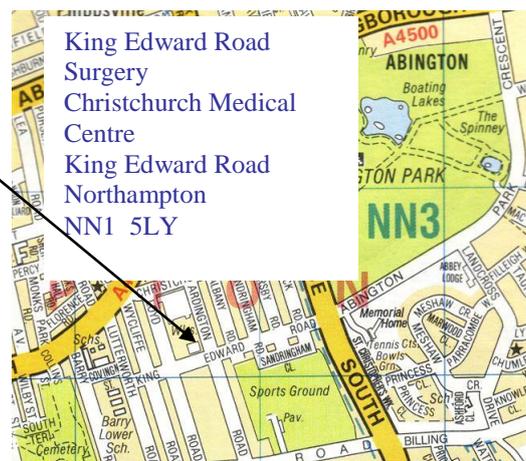

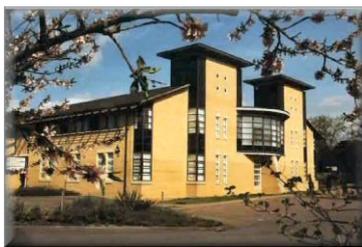

Extended Hours:

(Pre-booked doctor appointments only)

Weekdays - 8.00am until 6.30pm

Thursday 6.30pm – 8.30pm &

Saturday 7.45am – 11.00am

For urgent medical advice at other times:

NHS 111
Or visit www.nhs.uk

This leaflet can also be made available in large print. Please ask at Reception.

Welcome

Welcome to King Edward Road Surgery.

We are pleased to serve the people of Northampton and welcome you to our family practice.

We have always had a policy of accepting patients on a taxi cab principle i.e. not screening if they reside in our practice area. This provides us with an interesting mix of patients, but a mix that has a higher demand than the average. We hope you will understand and be tolerant if at times demand outstrips supply.

We will do our best to serve our population within the budgetary and other constraints imposed by the NHS.

History of the Practice

Records show that the practice dates back to 1845, and it may well have existed before then. An excellent history of the practice, entitled "The Story of a Northamptonshire Teaching Practice 1845 - 1992", was written by Dr Christopher Elliott-Binns, a distinguished previous partner in the practice. The book is available in Northamptonshire Teaching Libraries.

King Edward Road Surgery

The practice is sited slightly to the east of the town centre and is one of nearly 100 within Northamptonshire Primary Care Trust. We have around 11700 registered patients and our Primary Health Care Team consists of almost 40 people, including nearly 20 clinicians.

We have a tradition of innovation in many aspects of general practice and the NHS at large, both locally and nationally. Such innovation has spanned the development of practice premises, information systems, health service organisation, operational research, and the postgraduate education of doctors and nurses.

Our aspiration is to deliver the values of traditional family practice whilst using modern technology, custom designed premises and an integrated primary health care team to ensure that the clinical standard of that care is high.

This practice is accredited by
the East Midlands Healthcare
Workforce Deanery for the training of
General Practice Specialty Registrars.

King Edward Road Surgery is a training practice. This means doctors training to enter general practice spend up to a year with us in order to gain the experience and skills they need to become family doctors.

This leaflet is for both existing patients and those considering registering with us. It tells you about our services, how best to access them, and gives specific information about how our practice operates.

If you live in our practice area and would like to register with us, please complete the registration forms that are available from the reception desk. Our current practice area is detailed overleaf.

King Edward Road Surgery, Northampton

www.kers.org.uk

Our Practice Area & Registration

Practice areas change over time for many reasons. We currently accept patients from the areas listed below, and which fall within the area marked on the map.

Abington	Abington Vale	Bellinge	Blackthorn
Boothville	Cliftonville	Cottarville	Eastfield
Goldings	Gt. Billing	Hardingstone	Headlands
Kingsley	Kingsthorpe Hollow	Lake View	Langlands
Lings	Links View	Little Billing	Lumbertubs
Overstone Lodge	Parklands	Spinney Hill	Standens Barn
The Arbours	The Mounts	Thorplands	Town Centre
Weston Favell	Wootton		

When you register as a new patient it may take some time before we receive your medical record. This is because we have to request it from your previous practice via the NHS.

We therefore ask you to complete a short questionnaire so that we may obtain details of your past medical history, and current needs. If you have one, your medical card should be brought to the surgery and given to reception; or if not available we will provide you with registration form GMS 1.

Patients with particular needs

Our purpose built premises are designed with access for all in mind; slopes and a lift ensure access for those with disabilities. We also have two parking spaces outside the front door which are reserved for patients displaying a disabled sticker.

A hearing loop system is located at reception, with a portable loop available for clinic rooms. We can arrange interpretation and translation services in person or by phone for patients who do not speak English. Please let us know if you need any of these services when booking an appointment.

In addition to English, our doctors (subject to availability) are able to consult in Hindi, Punjabi, and Urdu.

Services

We seek to offer the full range of NHS General Practice services, which are subject to contracts between the NHS and Dr J Reeder & Partners (an unlimited partnership), and terms may vary or availability be limited. If you require a specific service please feel free to ask if it is one that is commissioned or provided privately e.g. medical reports.

Choice

All patients are allocated a named GP. However, you may express a preference for which clinician you wish to consult; indeed we encourage this to facilitate patient-centred continuity of care. Please ask at reception if you wish to formally record your preference, which is subject only to availability.

Clinical Services

1. Primary Prevention:

This is about managing the risks of disease. Examples of this would include eating a healthy diet, exercising and not smoking.

Ideally we would like to focus on Primary Prevention because it is better to prevent ill health than to treat it after its onset. Unfortunately we currently have to focus mainly on ill health.

If you need advice our Practice Nurses and Health Visitors would be happy to point you in the right direction or offer healthy advice.

The following evidence - based tips are a good starter-for-ten to help avoid heart disease and cancer.

Ref: (www.bandolier.org.uk):

1. **Eat whole grain foods** (bread, or rice, or pasta) on four occasions a week. This will reduce the chance of having almost any cancer by 40%. Given that cancer gets about 1 in 3 of us in a lifetime, that's big advice.
2. **Don't smoke.** If you do smoke, stop, Nicotine patches, gum or inhalers help a bit, but acupuncture won't help at all. Try to reduce your smoking, as there is a profound dose-response (the more you smoke, the more likely you are to have cancer, or heart or respiratory disease). So cut down to below five cigarettes a day and leave long portions of the day without a cigarette. Ask us for further advice.
3. **Eat at least five portions of vegetables and fruit a day**, and especially tomatoes (including ketchup), red grapes and the like, as well as salad all year. This protects against a whole variety of different nasty things:
It reduces the risk of stroke dramatically
It reduces the risk of diabetes considerably
It will reduce the risk of heart disease and cancer.
4. **Use Cholesterol – lowering spreads instead of butter or margarine, if you can afford them.** They really do reduce cholesterol, and reducing cholesterol will reduce the risk of heart attack and stroke even in those whose cholesterol is not particularly high.
5. **Drink alcohol regularly.** Moderate alcohol consumers have lower mortality than either non-drinkers or heavy drinkers. The type of alcohol probably doesn't matter too much, but for an adult male the equivalent of a couple of glasses of wine a day or a couple of beers is beneficial, and the levels for females are about 25% less. Do not binge – it is a bad idea to drink a week's quantity at the weekend!

6. **Eat fish.** Eating oily fish (Mackerel, Sardines, Salmon etc) once a week won't stop you having a heart attack, but it reduces the likelihood of you dying from it by half.
7. **Take a multivitamin tablet every day,** but be sure that it is one with at least 200 micrograms of Folate. The evidence is that this can substantially reduce chances of heart disease in some individuals, and it has been shown to reduce colon cancer by over 85%. It may also reduce the likelihood of developing dementia. Folate is essential in any woman contemplating pregnancy because it will reduce the chance of some birth defects.
8. If you are pregnant or have high blood pressure, **coffee** is best minimised. For the rest of us drinking four cups of coffee a day is likely to reduce our chances of getting colon cancer and Parkinson's disease.
9. **Get breathless more often.** You don't have to go to a gym or be an Olympic marathon runner. Simply walking a mile a day, or taking reasonable exercise three times a week (enough to make you sweat or glow) will substantially reduce the risk of heart disease. If you walk, don't dawdle. Make it a brisk pace. One of the benefits of regular exercise is that it strengthens bones and keeps them strong. Breaking a hip when elderly is a very serious thing.
10. Check your height and weight on a chart to see if you are **overweight** for your height. Your body mass index is the weight in kilograms divided by the height in metres squared: for preference it should be below 25. If you are overweight, lose it. This has many benefits. There is no good evidence on simple ways to lose weight that work. Crash diets don't work in the long run. Take it one step at a time, do the things that are possible now, and combine some calorie limitation with increased exercise.
11. Check your blood pressure regularly using our waiting room monitor, or your home monitor and copy the readings to us on repeat prescription requests, the form provided by the machine or by email: blood.pressure@gp-K83012.nhs.uk.

If appropriate for you we can offer: Blood sugar checks, Cervical smears, Cholesterol assessments, Contraception /safe sex advice, Flu vaccinations, Mammography, Pre-pregnancy advice, Prostate assessments, Smoking cessation assistance, Travel Immunisation advice.

And don't forget: Regular eye checks from an Optician (glaucoma), regular Dental checks, and the value of your pharmacist.

2. Secondary Prevention:

This is the prevention of diseases or the worsening of health in people who already have health problems.

If you have any of the following conditions please ask for the relevant leaflet describing the service we provide.

- Chronic Obstructive Pulmonary Disease (COPD)
- Diabetes
- Coronary Heart Disease (Angina)
- Hypertension (High Blood Pressure)
- Strokes or Transient Ischaemic Attacks (TIA)
- Asthma
- Epilepsy
- Hypothyroidism

In addition, NHFT Health Visitors run Well Baby and Immunisation clinics

NGH Midwifery Service provides a Midwife for regular Antenatal clinics at the surgery.

The Mammography & Cervical Cytology screening services are organised centrally within the town.

Retinal screening for diabetics is organised centrally within the town.

3. New Problems:

Telephone Consultation:

You may not want to see a doctor or nurse but just need some advice over the phone. This can be obtained from the 111 NHS service, available 24/7, or from the surgery.

If you wish to seek advice from our practice team, please book an appointment online, indicating you require a phone call and detailing the contact number in the brief details box: or please call:

Doctors, Practice Nurses, and Midwife – 01604 611600. The receptionist will arrange a time for the appropriate clinician to call you back.

Health Visitors - 01604 631373. Direct line. The best time is between 9am & 10am.

District Nurses – 03007770002. Direct line. The team regularly visit the surgery between 8.00am & 3.30pm.

The Midwife, Health Visitor, and District Nurse teams are very much an integral part of our practice team, but are actually employed and managed by other NHS bodies (Trusts), and are therefore not directly accountable to the practice.

Consultation at the practice:

All our staff are trained in and are required to uphold your confidentiality. It greatly helps us to provide a better service if you tell the receptionist a few details of the problem.

If you would like to make an appointment for a consultation about a new problem, you may book on-line 24/7, or phone the practice during opening hours.

We run a "telephone consultation" process every day. Any callers seeking advice or an appointment on the day, who call before 9.30 am, will get a call back from a Doctor or Nurse (depending on the type of problem) , before 10am .

In the call back the Clinician will either make you an appointment or give suitable advice over the telephone. After 9.30, similar callers will get a call back between 1.30 and 3.30, and urgent cases will still be seen that afternoon.

Duty Nurses – appointments for the following will normally be with a Nurse:

Acne / boils	Backache	Constipation
Coughs / colds / flu / sore throat	Diarrhoea / vomiting	Ears / Nose / Throat
Emergency contraception	Exacerbations of asthma	Gynaecological problems
Haemorrhoids	Hay fever	Headaches / migraine
Mouth ulcers	Non-specific viruses	Rashes
Sexually transmitted infections	Shingles	Sinusitis
Skin infections	Sprains / strains	Sticky eyes / conjunctivitis
Urinary infections	Vaginal infections	Worms / lice / scabies

The telephone lines open at 8:00am. Surgeries are offered every weekday morning and afternoon, usually from 8.30am – 11.20am, and 1.30pm – 5.30pm.

During the 'extended hours' periods **only** pre-booked doctor appointments are available: Thursday 6.30pm to 8.30pm, and Saturday 7.45am to 11.00am.

If you have given us a mobile phone number we will text you with an appointment confirmation at the time of booking and a reminder the day before your appointment.

You can help us by:

- Booking your appointments on-line or via our automated telephone booking service – this frees up lines for those without internet access
- Being on time for your appointment
- Letting us know if you need to cancel well in advance – either by internet or phone, or you can text us on 07999 517758 quoting your name and date of birth, or reply CANCEL to your appointment text reminder.

Home visits

Whenever possible we ask you to come to the surgery where we have more and better facilities and support. But if you are housebound or judged medically to be too unwell, either a practice doctor or one of our community nurses will see you at home. We cannot visit because you lack transport to the surgery.

If you need a doctor, please phone reception on **01604 611600- before 10:00am if possible.**

If you need a nurse, please phone our community nurses on direct line **01604 259439 - again before 10:00am if possible.**

Evenings, Weekends and Bank Holidays

Remember professional health advice is available day and night from the NHS:
<http://www.nhs.uk>. Telephone 111.

Out of Hours services are a separately commissioned service and will provide assistance out of hours via the 111 service. Please note for non-urgent matters this is not an alternative to coming to the practice.

4. Long term Problems:

Conditions such as asthma, diabetes, heart disease, hypothyroidism etc. may be long term or even life long. They all require regular review by you and the practice working together.

What we aim to do is to make the review process as efficient, effective, and convenient for you as possible. Our programme revolves around an annual review appointment with the nurses, usually at about the time of your birthday. We will write to you, inviting you to attend an invitation appointment.

Even if you have more than one such condition we will usually be able to deal with them all at a single annual review appointment - saving you time and inconvenience.

Usually the process will involve two stages:

- First, seeing the Phlebotomist for investigations such as blood tests.
- Second, a week later, attending the Annual Review Clinic for assessment and advice.

Our letter contains a reference, which you will be asked to quote at the time of making an appointment. This will help our Receptionists to book the right appointments for you.

Please note that it is a condition of our NHS contract that we review all patients with these conditions at least once a year, and that our administrative staff may be unable to issue repeat medication for anyone whose review is overdue.

Greater detail is available on the following conditions on our website, or from our leaflets available from the rack in the waiting room.

Asthma Coronary Heart Disease Chronic Obstructive Pulmonary Disease
Diabetes Epilepsy High Blood Pressure (Hypertension) Hypothyroidism
Stroke and TIA

Other Contractual Entitlements

Patients not seen within 3 years

A registered patient aged between 16 and 75 who has not attended a consultation within the past three years may request a consultation. In such a case the clinician shall, in the course of that consultation, make such inquiries and undertake such examinations as appear to be appropriate in all the circumstances.

Patients aged 75 years and over

A registered patient aged 75 years; and who has not participated in a consultation within the period of twelve months prior to the date of his request, may request a consultation, which will be undertaken by a clinician, who will make such inquiries and undertake such examinations as appear to it to be appropriate in all the circumstances.

A consultation shall take place in the home of the patient only where, in the reasonable opinion of the Contractor, it would be inappropriate, as a result of the patient's medical condition, for them to attend at the practice premises.

Dental Problems

Neither the practice nor the Out of Hours service can provide consultations for dental problems.

You can find a dentist to register with via www.nhs.uk or by calling 111 if urgent or out of hours.

Repeat Prescriptions:

Introduction:

Your doctor will inform you if your medication can be obtained through the repeat prescription process. Any requests to receptionists for items that are not detailed on your personal repeat medication list will not be issued without you speaking to a Duty Nurse or doctor first.

Please note that we review the care of all our patients who receive their medication by repeat prescription at least annually. This is not only good clinical practice but is a requirement under our contract with the NHS.

1. Order on-line with the practice

You are able to order your repeat medication on-line, direct to the practice over an encrypted, secure link. There is still a need to allow 48 hours before you collect the prescription. Please ask at Reception for details about this service and for registration.

2. Order by email, fax or place within the box between the entrance doors

Email us at prescriptions@k83012.nhs.uk, quoting your name, date of birth and the medication you require.

Alternatively use the paper re-order slip printed on the right hand side of your repeat prescription. Just tick the items you need and either post or fax (**01604 603227**) it to the surgery or put it in the box at our entrance. (If you enclose an s.a.e. the prescription will be posted to you).

Please note that we **do not** accept repeat prescription requests over the telephone as this is open to error and considered to be a high clinical risk, though we do have an automated

telephone system when you can make repeat requests. Please ask at Reception to be set up for this service.

There will be a **Review Date** printed at the bottom of the re-order slip. Our staff are not authorised to issue repeat medication once that date has passed, so as it approaches please make an appointment for review. If you are housebound, then please ask the receptionist to arrange for your doctor or District Nurse to visit you for this review consultation.

3. Order direct from your local pharmacist

Many of the town's pharmacists, including the Lloyds Pharmacy on our site, will now accept your repeat prescription request, collect the prescription and have your medicine ready for you to collect; or arrange delivery. Please ask your pharmacist.

4. Electronic prescriptions

Please nominate a Pharmacy of your choice where your prescriptions can be sent electronically. It saves time for you and us.

Test Results:

Please telephone for test results between 2pm and 5pm in the afternoon, and select the appropriate option. We do not take such calls in the morning in order to keep our phone lines free for those wanting to make appointments.

For confidentiality reasons we do not provide results over the reception desk.

Please call after 10:00pm on 01604 611600.

Some results may take seven or more days to come back.

Please note: Every test result is usually examined by the doctor who ordered it and a message left for when you phone the practice. We do **not** contact patients routinely with test results, as this is simply not possible with the vast numbers concerned, and is fraught with problems.

Please note that for reasons of confidentiality we may decline to give results to anyone other than the patient concerned, even though the request is from a relative or friend. This is a legal requirement, and we ask for your understanding even if on occasion it seems deliberately obstructive. For the same reason, we cannot give results of children to parents once they reach the age of 16, and sometimes even younger.

Patient confidentiality

We respect your right to privacy and keep all your health information confidential and secure. It is important that the NHS keeps accurate and up-to-date records about your health and treatment so those treating you can give you the best possible advice and care.

This information is only available to those involved in your care (which includes all practice staff), and you should never be asked for personal medical information by anyone not involved in your care. You have a right to know what information we hold about you. The rights of access by living people to their health records whether computerised or manual are

as set out in the Data Protection Act 1998 and its regulations. Formal applications for access must be in writing and accompanied by the appropriate fee. If you wish to access your records, application forms with details of fees are available from reception.

Please note some GP clinical systems include functionality that allows a GP to restrict access to elements of patients' electronic health records to different levels of user within the practice. This functionality is not consistent across systems and any data that is hidden is likely to be revealed when the patient record is transferred to another GP clinical system. This can happen when a patient's record is transferred to another practice via traditional paper record transfer or GP to GP or following a data migration to another GP clinical system in the practice.

We therefore wish to advise you that where you who want elements of their electronic health record to be kept confidential, that the information is not likely to remain hidden when the record is transferred to another system, either electronically or via paper transfer.

Mutual Respect

We aim to treat our patients courteously at all times and expect our patients to treat our staff in a similarly respectful way. The NHS and this practice operate a policy of Zero Tolerance of any threatening, abusive or violent behaviour against any partner, member of staff or any person on the practice premises. If a patient is violent or abusive, they will be warned to stop their behaviour. In the event of further difficulty we will exercise our right to take action to have them removed, immediately if necessary, from our list of patients.

KERS Patient Participation Group

This independent group, representing KERS patients, exists to support both patients and the practice in developing services and facilities at the surgery. The group gained the Royal College of General Practitioners (RCGP) PPG Award in 2006.

If you would like more information, please obtain a copy of its quarterly newsletter 'Contact' from the surgery or online.

Hospital Choice:

Under the NHS Choose & Book initiative, you are able to select from a choice of hospitals when a referral is made. Your doctor will provide you with a booklet detailing this initiative, and complete your chosen referral. Either immediately, or within a day or so, you will receive a letter from the practice detailing your booking reference and password. It is then your responsibility to contact the booking centre and choose date and time of appointment. The usual choice of local providers includes Northampton, Kettering, Leicester, Rugby, and Warwick.

Accident and Emergency/999

Whatever the day or time, if you or someone else experiences severe chest pain, loss of blood or suspected broken bones, go to your nearest accident and emergency department or call **999**.

Accident and emergency departments are open 24 hours a day, 365 days a year and can assess serious injuries and provide emergency treatment.

Other NHS services

As well as our practice, there are many other local NHS services you can contact for health advice, information, or treatment. Before you do, remember that you can treat many minor

ailments such as colds, coughs, and indigestion by keeping a well-stocked medicine cabinet at home. We suggest you keep the following:

- Paracetamol and aspirin (children under 16 and asthmatics should not take aspirin)
- Mild laxatives
- Anti-diarrhoeal medicines
- Rehydration mixture
- Indigestion remedy (for example, antacids)
- Travel sickness tablets
- Sunscreen – SPF15 or higher
- Sunburn treatment (for example, calamine)
- Tweezers and sharp scissors
- A thermometer
- A selection of plasters; non-absorbent cotton wool, elastic bandages, and dressings.

Remember

- Keep the medicine chest in a secure, locked place out of reach of small children
- Always read the instructions and use the suggested dose
- Watch expiry dates – don't keep or use medicines past their sell-by date
- Take all unwanted and out-of-date medicines back to the pharmacy

Your local pharmacist

Your local pharmacist will be able to give you free health advice and you don't need an appointment. Many pharmacies operate extended hours on a rota basis. For details call NHS on 111.

NHS

The NHS offers free expert health information and advice 24-hours a day on 111; or at their website, www.nhs.uk which also offers an enquiry service. For deaf people and those hard of hearing, a telephone service is also available on 08001 111. If English is not your preferred language, you can choose to use a confidential translation service.

Non NHS Services

The NHS does not cover some of the services provided by GPs, who are therefore obliged to charge a fee for them. This work includes production or completion of various reports, letters, holiday requirements (e.g. insurance forms, immunisations and cancellation certificates), insurance claims, driving certificates etc.

These fees are payable at the time of request of these services. If you are in any doubt as to whether a service is available under the NHS, please do not hesitate to ask the receptionist.

A list of charges for non NHS services is available at reception. Please confirm the price of services by asking the Receptionist.

Concerns

King Edward Road Surgery aims to give a friendly and professional service to all our patients. We hope that you will appreciate our service and may even wish to encourage our

team when they give exemplary care. However, we recognise we are not perfect, and welcome constructive comment as to how we may improve our systems within contractual limitations.

We hope that you might tell us of any concern that does not require a formal complaint. But if you feel you need to, you may speak to any member of our team, or if you prefer write to the practice manager. Our manager will be willing to see you if available, and is responsible for handling all complaints. We take your concerns very seriously as we wish no one to be dissatisfied and they provide an opportunity to review systems and procedures and make changes where appropriate. A leaflet is available detailing the complaints procedure from the display in the entrance lobby, and a complaint form is available from Reception or online.

If you are unable to discuss your complaint directly with the Practice, or your complaint relates to another NHS provider, you can ask NHS ENGLAND to look into your concerns. The contact details for NHS ENGLAND are:

Telephone 0300 311 22 33
Email englandcontactus@nhs.net

This will direct you to a customer contact centre who will deal with your concerns and agree actions to resolve them.

You can also write to them at:
NHS Commissioning Board
PO Box 16738
Redditch, B97 9PT

Independent Complaints and Advocacy Service (ICAS)

ICAS is a national service that supports people who want to make a complaint about their NHS Care or treatment. Your local ICAS service can be found on

http://www.pohwer.net/how_we_can_help/icas_providers.html

Ombudsman

As a last resort, if you are not happy with the response from this practice, you can refer your complaint to the Parliamentary and Health Service Ombudsman who investigates complaints about the NHS in England. You can call the Ombudsman's Complaints Helpline on 0345 015 4033 or <http://www.ombudsman.org.uk> or Textphone (Minicom): 0300 061 4298

Contacting the Care Quality Commission

If you have a genuine concern about a staff member or regulated activity carried on by this Practice then you can contact the Care Quality Commission on 03000 616161, or alternatively visit the following website: <http://www.cqc.org.uk>
